In 2019, FoBBIZ has started a thematic series on “The Role of Apprenticeship for the Future of Work”. A first event in December 2019 took a global perspective, looking at different understandings and approaches around the world. A second event in September 2020 then discussed in more detail the (potential) role of Swiss actors in the international debate on apprenticeship. Based on these discussions, FoBBIZ has drafted a position paper which we would like to discuss during the upcoming event on the 17th November 2020.
